

NEOS ANALOG handset

- Opening
- call LED
- Auxiliary
- HANG switch

- Microphone
- Speaker

calling and conversation

When a call is received from the entrance panel, the phone starts ringing and the status LED lights up.

The user can open directly, by pressing the button  , or pick up the handset to establish a conversation.

external functions

The handset has 1 independent push-button  that allow auxiliary functions, such as garage doors, lights, irrigation, etc ...

To do this, an Auta auxiliary relay must be connected to the control circuit we want to control.
